### Summary

---

Senior Software Engineer with 20+ years of experience, specializing in full-stack development and team leadership. Proven track record of delivering high-impact solutions that drive business growth through technical excellence, clear communication, and strategic thinking.

## Career Highlights

---

### Automation and Growth

Led the interview scheduling automation at Gun.io, integrating Zoom and Google Calendar, saving hundreds of staff hours while contributing to the company 50% annual growth

### Major Revenue Increase

Implemented payment controls and workflows for bilheteriadigital.com, increasing monthly revenue by hundreds of thousands of dollars through improved fee collection

### E-commerce Sales Boost

Developed custom e-commerce plugin for La Bodega Coffee, eliminating checkout errors that caused 30% sales loss, resulting in 30-40% increase in successful transactions

### Critical Project Recovery

Rescued and relaunched tlaonline.com in 3 months after previous team struggled for 2 years, delivering a successful website that continues to thrive today.

# Experience

---

## MiMetrix/Intelycx

2024 - 2025

### Senior Software Engineer

- Architected scalable APIs for real-time IoT sensor data processing and analytics
- Built interactive dashboards using Vue.js and chart libraries for real-time data visualization
- Advocated for and initiated test automation practices, improving code quality standards
- Proposed and planned Vue 3 migration strategy to modernize the tech stack

AWS

Python

Django

Elasticsearch

GraphQL

Vue.js

Docker

Git

## MineLive

2024 - 2025

### Tech Lead

- Led the engineering team at a media streaming startup, developing the product from the ground up in collaboration with AWS experts.
- Reviewed and approved the product architecture, utilizing Java SpringBoot, React, and AWS services.

AWS

Java SpringBoot

React

Node.js

GraphQL

Generative AI

## Solid State Vinyl

2024

### Full-stack Engineer

- Upgraded libraries and established a new CI/CD pipeline with automated testing and Dependabot integration.
- Integrated Airtable with the company app and Shopify store to streamline operations.

Airtable

**Gun.io**

**2020 - 2024**

**Senior Software Engineer**

- Led the implementation of a comprehensive test automation initiative, enhancing platform reliability
- Developed an interview scheduling system integrating Zoom and Google Calendar, significantly reducing manual scheduling efforts
- Implemented Elasticsearch-powered search and analytics, enhancing platform performance and user experience

Heroku Python Pytest Django Elasticsearch PostgreSQL Docker Vue.js  
TypeScript Vite Cypress Playwright Tailwind CSS Git Hubspot  
Google Calendar Zoom

**Bodega.coffee**

**2018 - 2025**

**Full-stack Engineer**

- Implemented Wordpress theme and plugins to enhance the company website
- Created an integration with Intacct to streamline the company's financial operations, increasing sales by 30-40%
- Developed a mobile app for their staff to record coffee related information

PHP APIs Cordova Ionic Angular Mobile App Bootstrap MySQL  
Wordpress CodeIgniter jQuery Git

## Agriachieve

2021 - 2022

### Senior Software Engineer

- Collaborated with a Canadian agriculture and food industry company to enhance their product and service documentation processes.
- Automated the creation and management of structured data for industry standards by integrating with the Google Docs API, significantly boosting documentation efficiency and accuracy.

PHP JavaScript Google Docs API

## Bilheteria Digital

2022

### Senior Software Engineer

- Engineered payment workflow system resulting in monthly revenue increase through optimized fee collection

PHP Laravel Yii2 Payments MySQL

## SmartConnect

2018 - 2019

### Senior Software Engineer

- Built real-time monitoring dashboard with predictive alerts
- Successfully transformed web platform into mobile app using Cordova and Ionic

Cordova Ionic MySQL PHP Vue.js Openlayers Leaflet Turf.js

# Learning Tapestry

2017 - 2018

## Tech Lead

- Led successful PHP migration (5.3 to 7.2) while implementing modern CI/CD practices
- Developed ed-fi.org integration for advanced educational analytics and reporting
- Acted as a DevOps Engineer, implementing AWS services
